

# distribution of highest bootstrapping percents across nodes

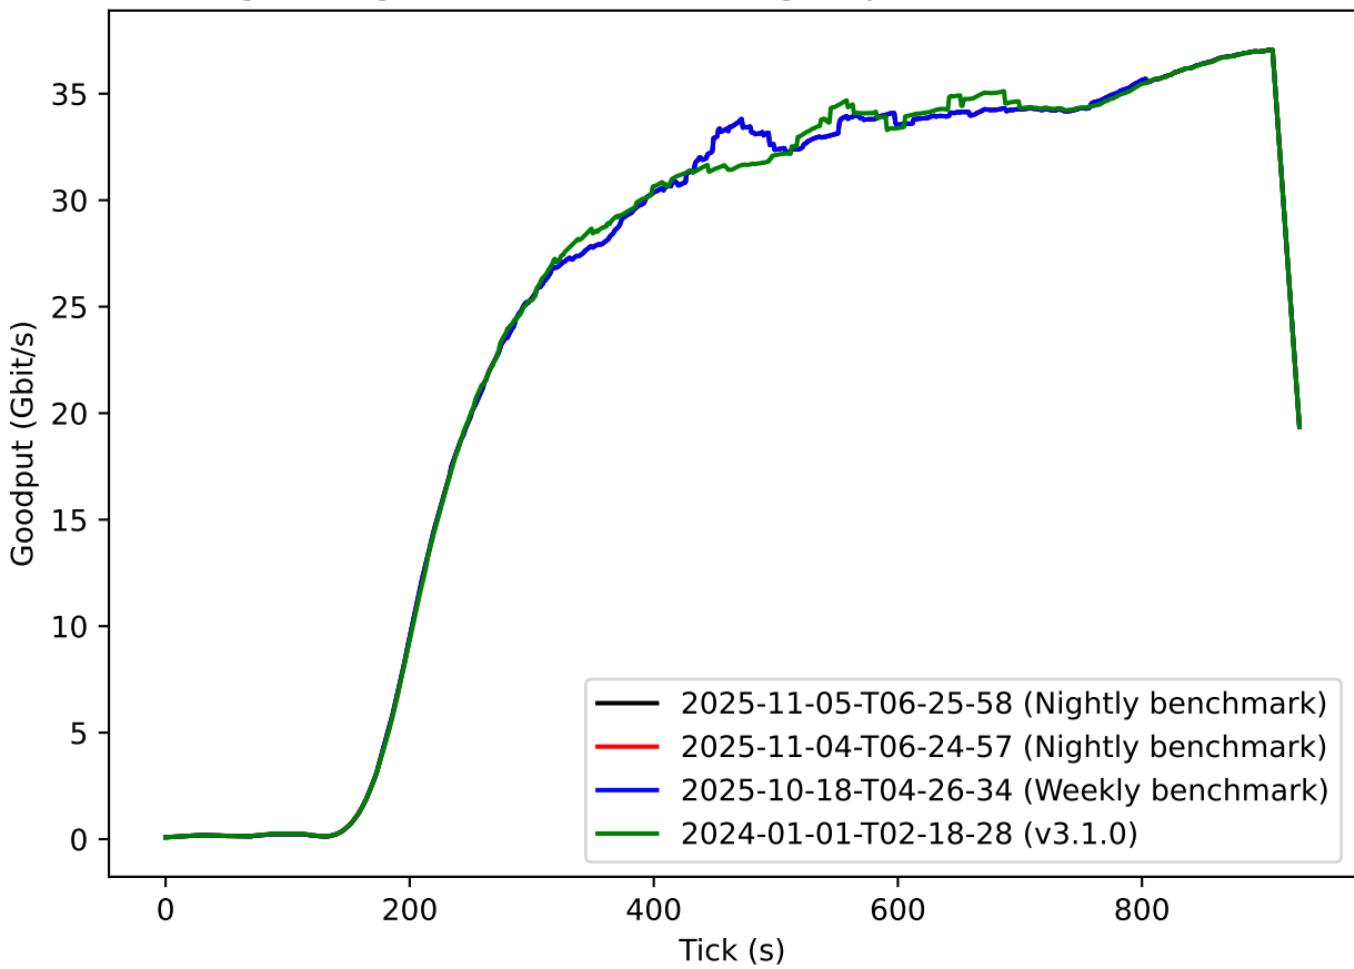

distribution of bootstrapping completion times across nodes

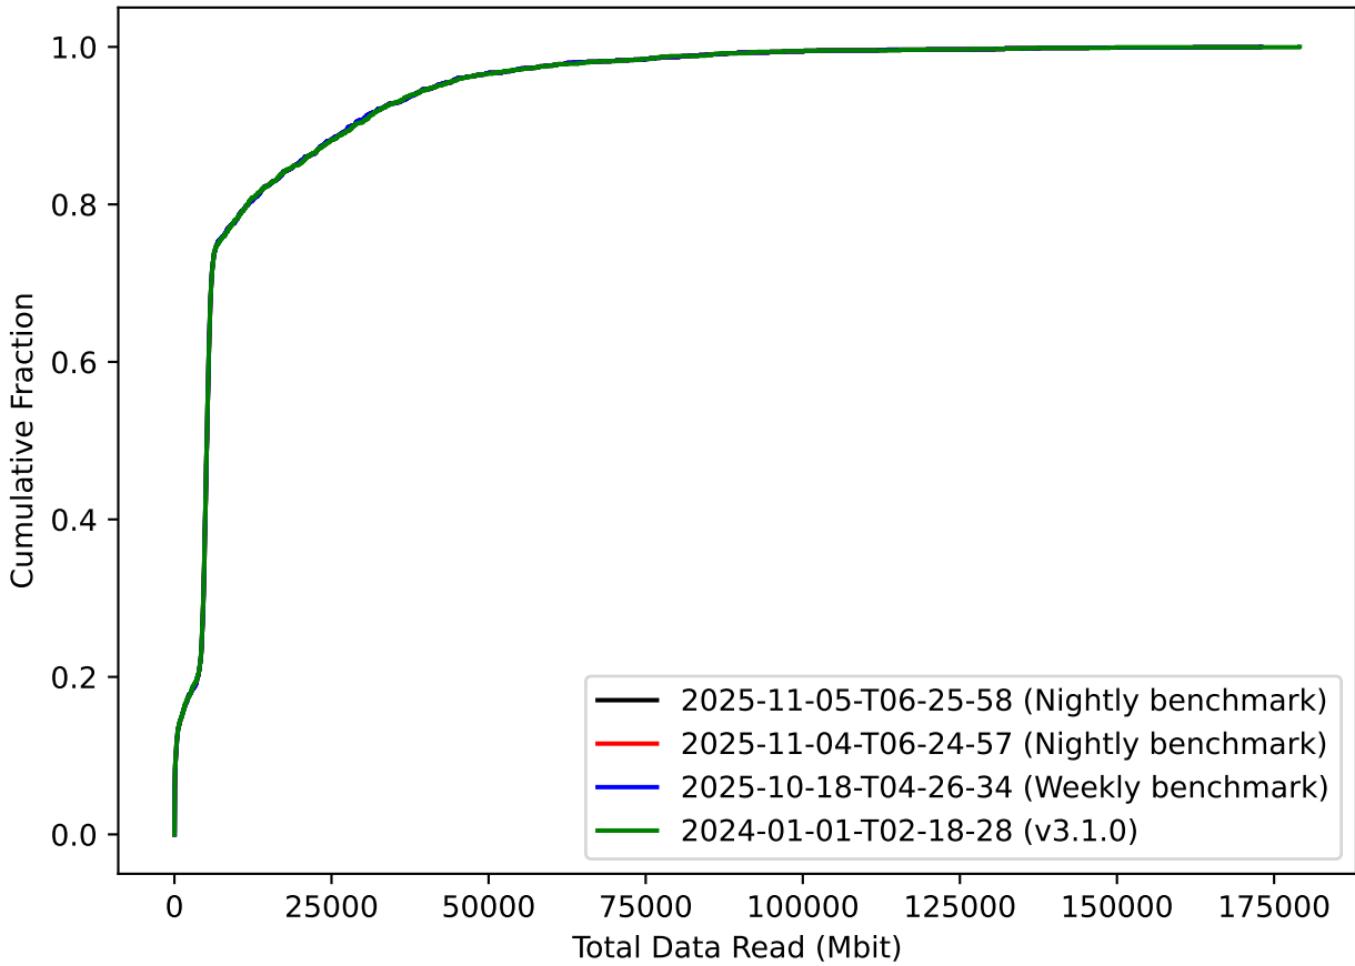

moving average of the sum of read goodput for all nodes over time

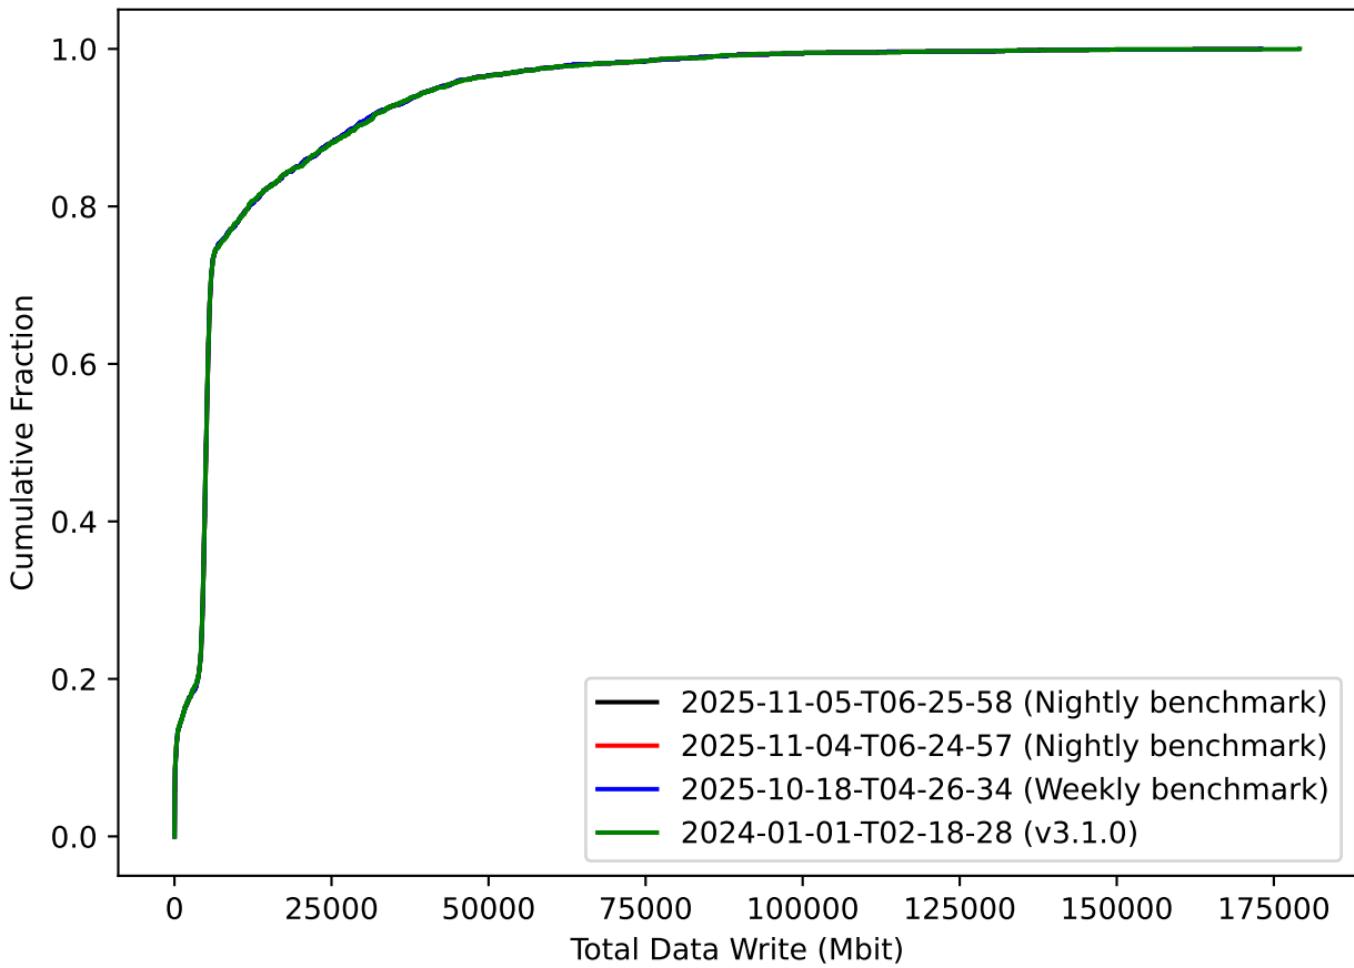

moving average of the sum of write goodput for all nodes over time

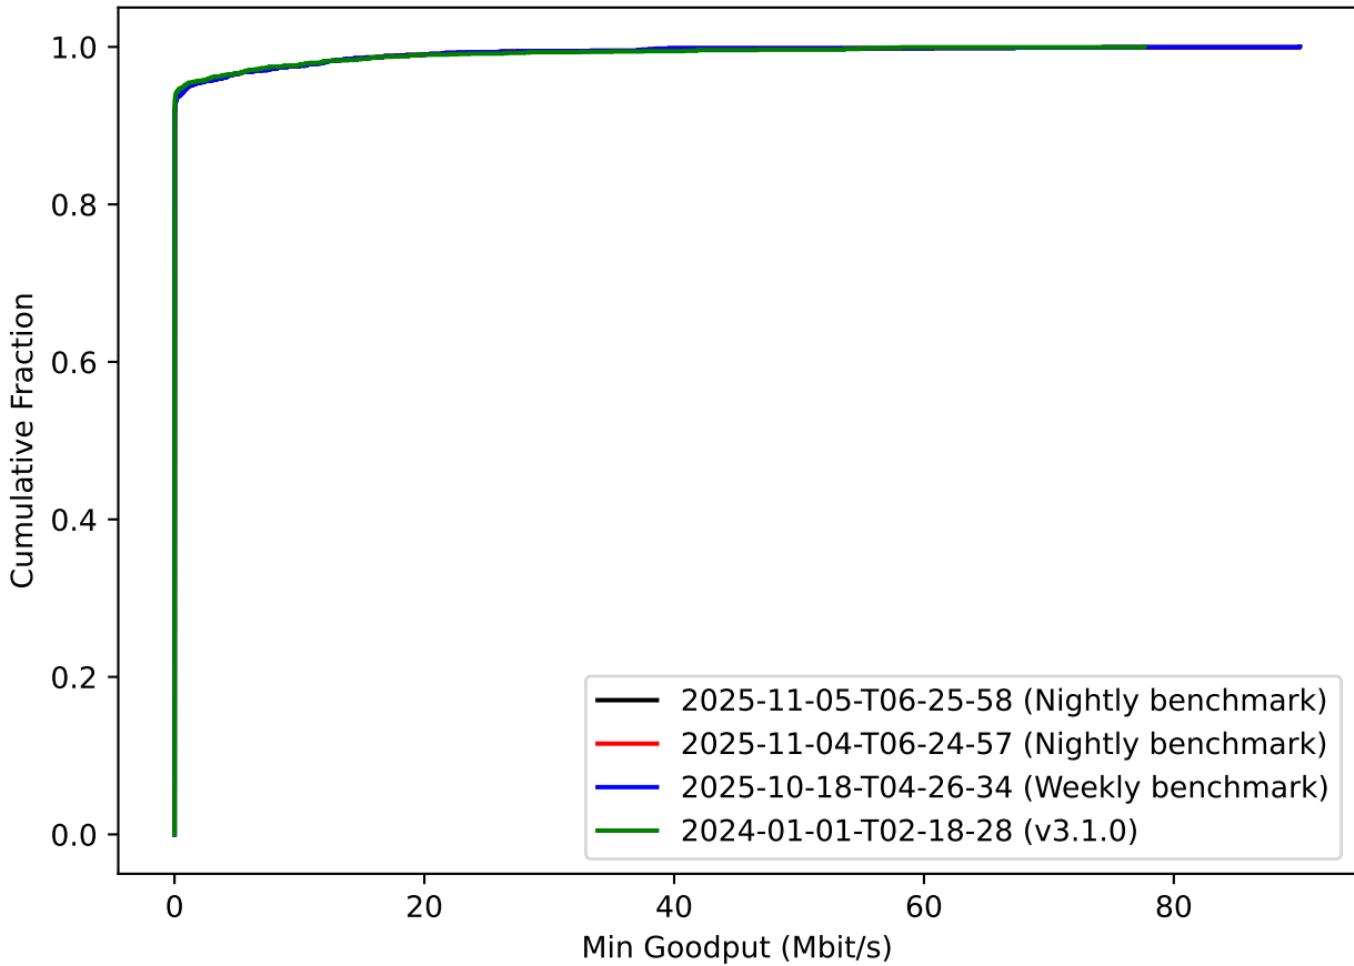

distribution of: total read goodput per second, across nodes

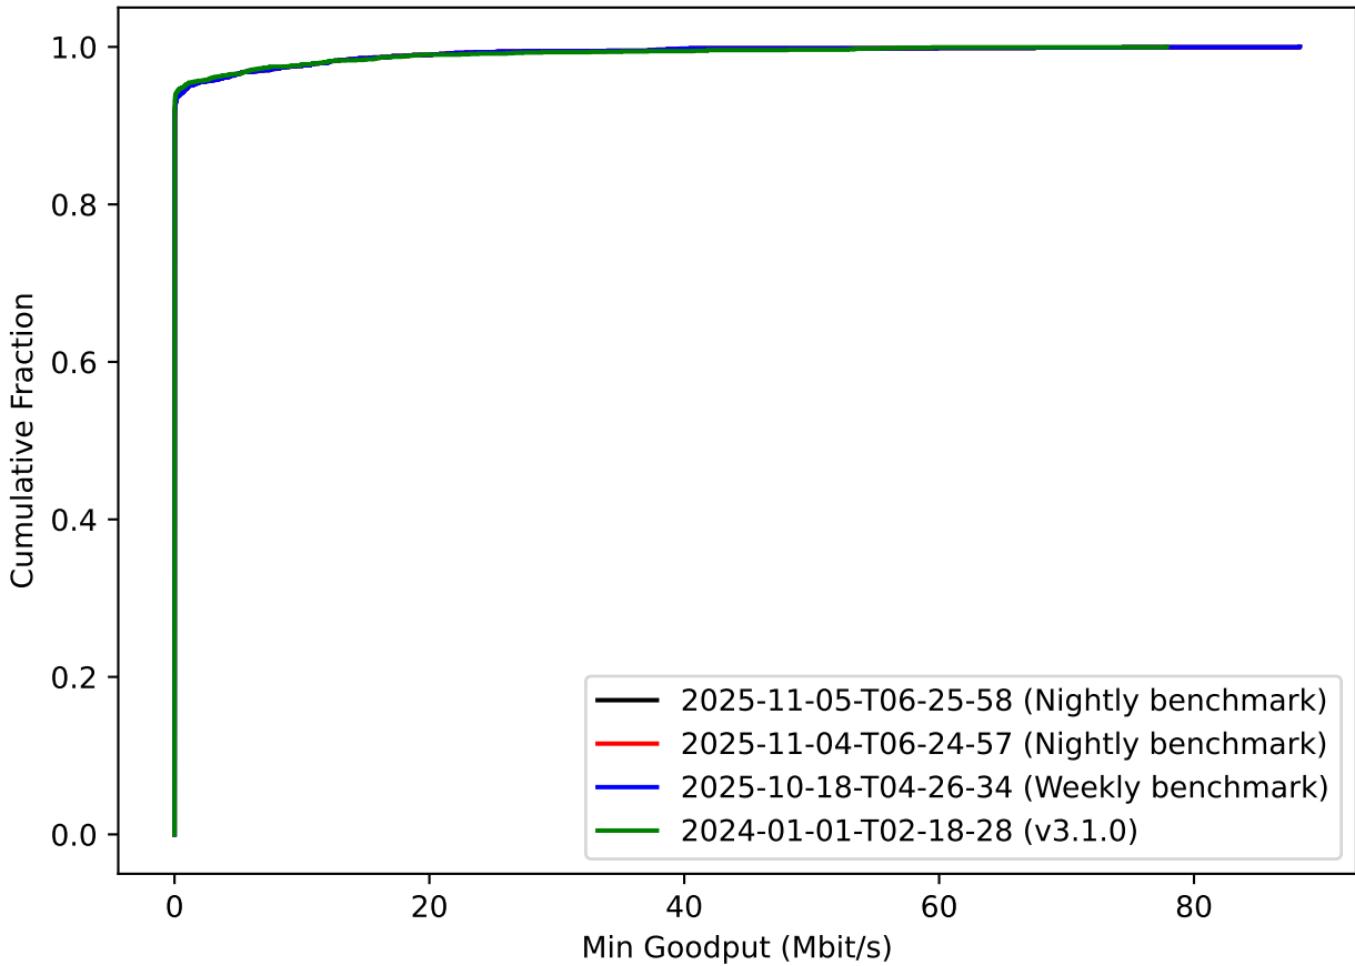

distribution of: total write goodput per second, across nodes

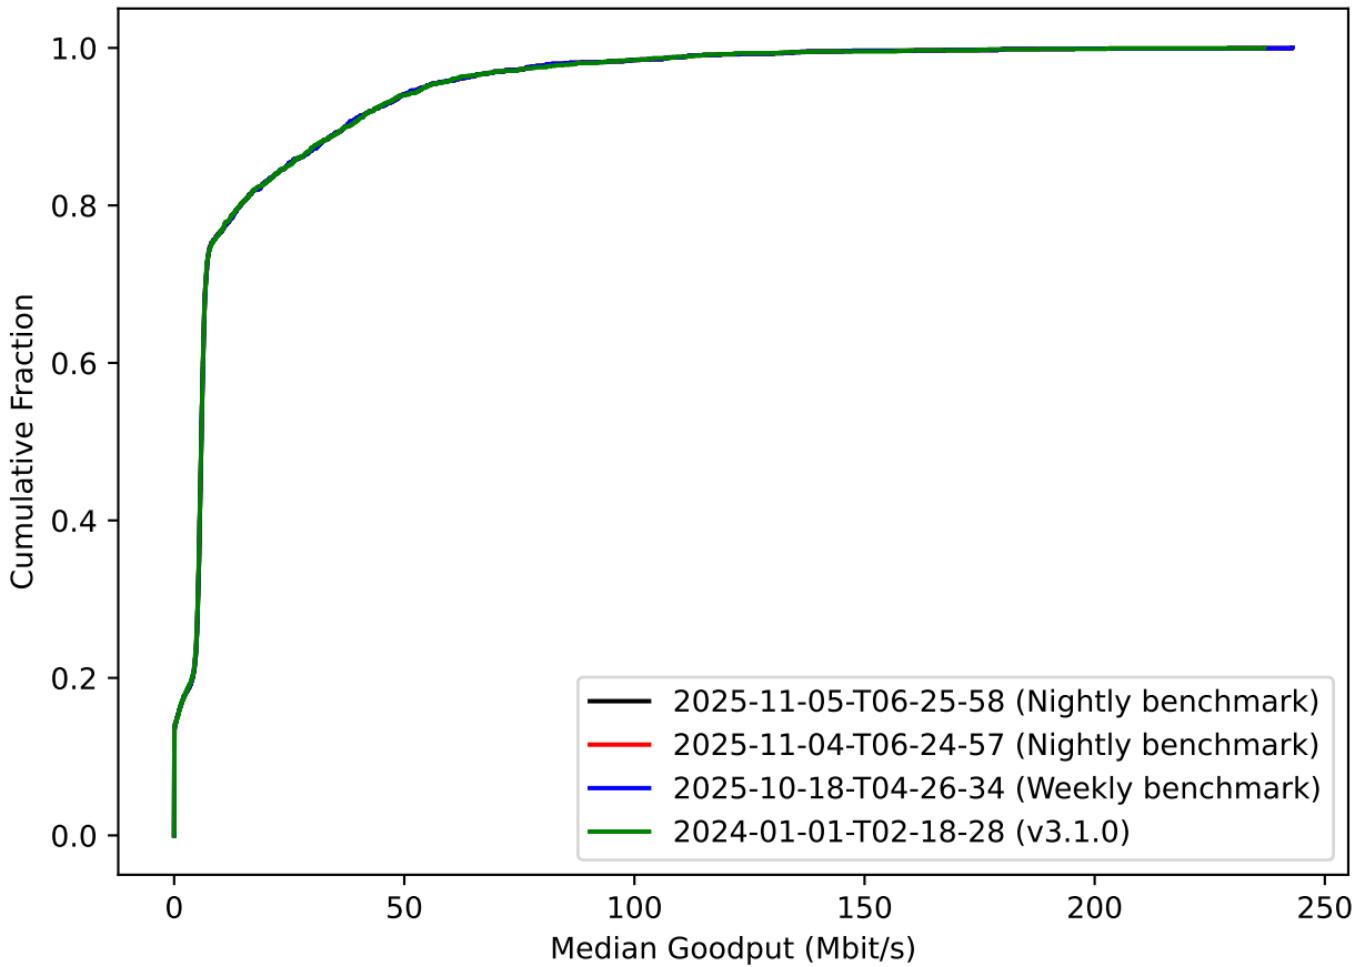

distribution of: min read goodput per second, across nodes

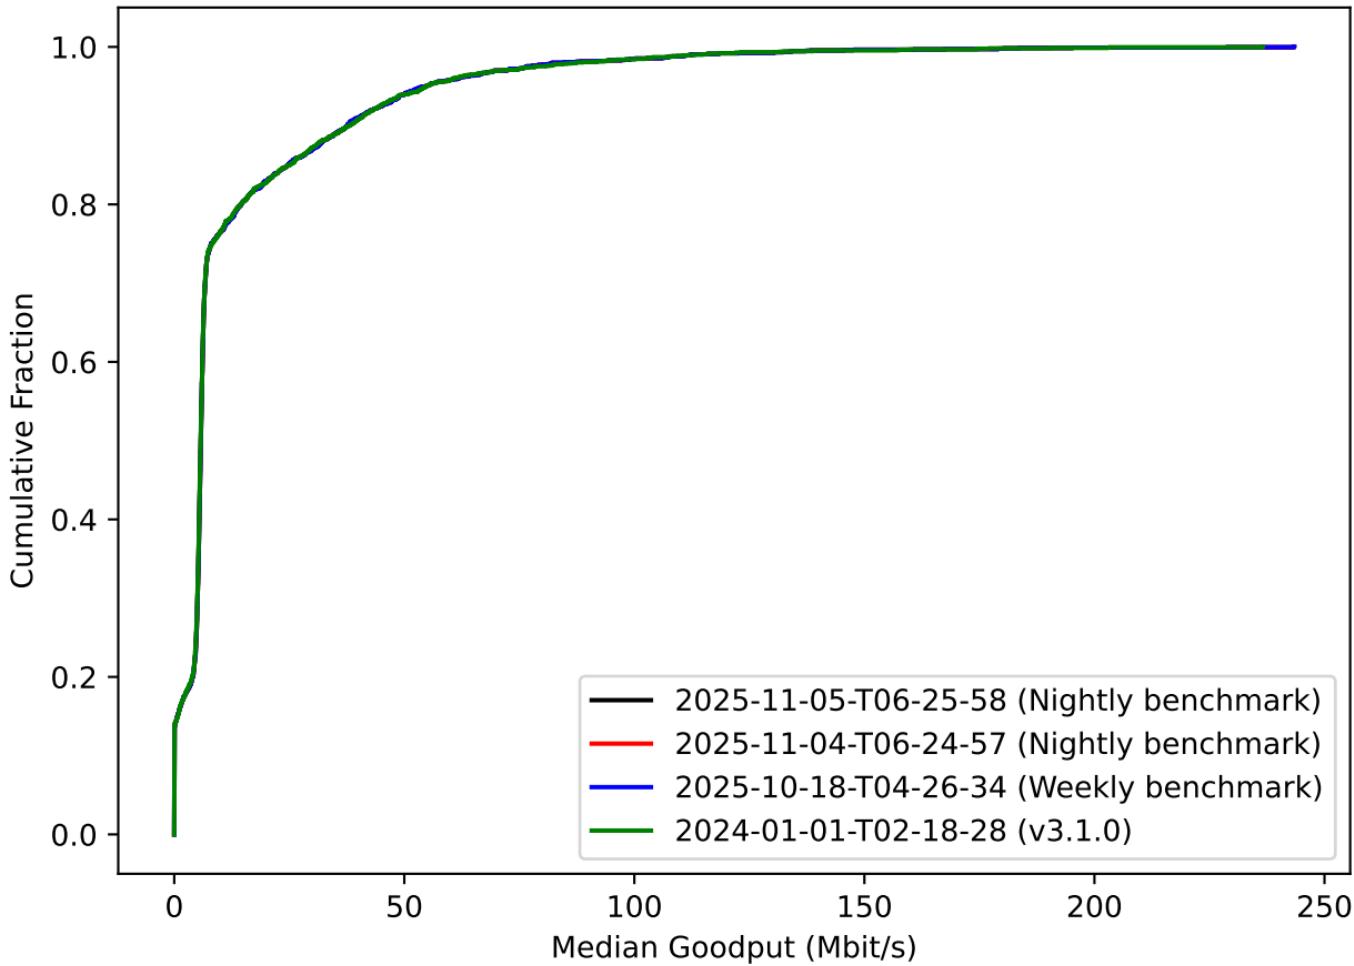

distribution of: min write goodput per second, across nodes

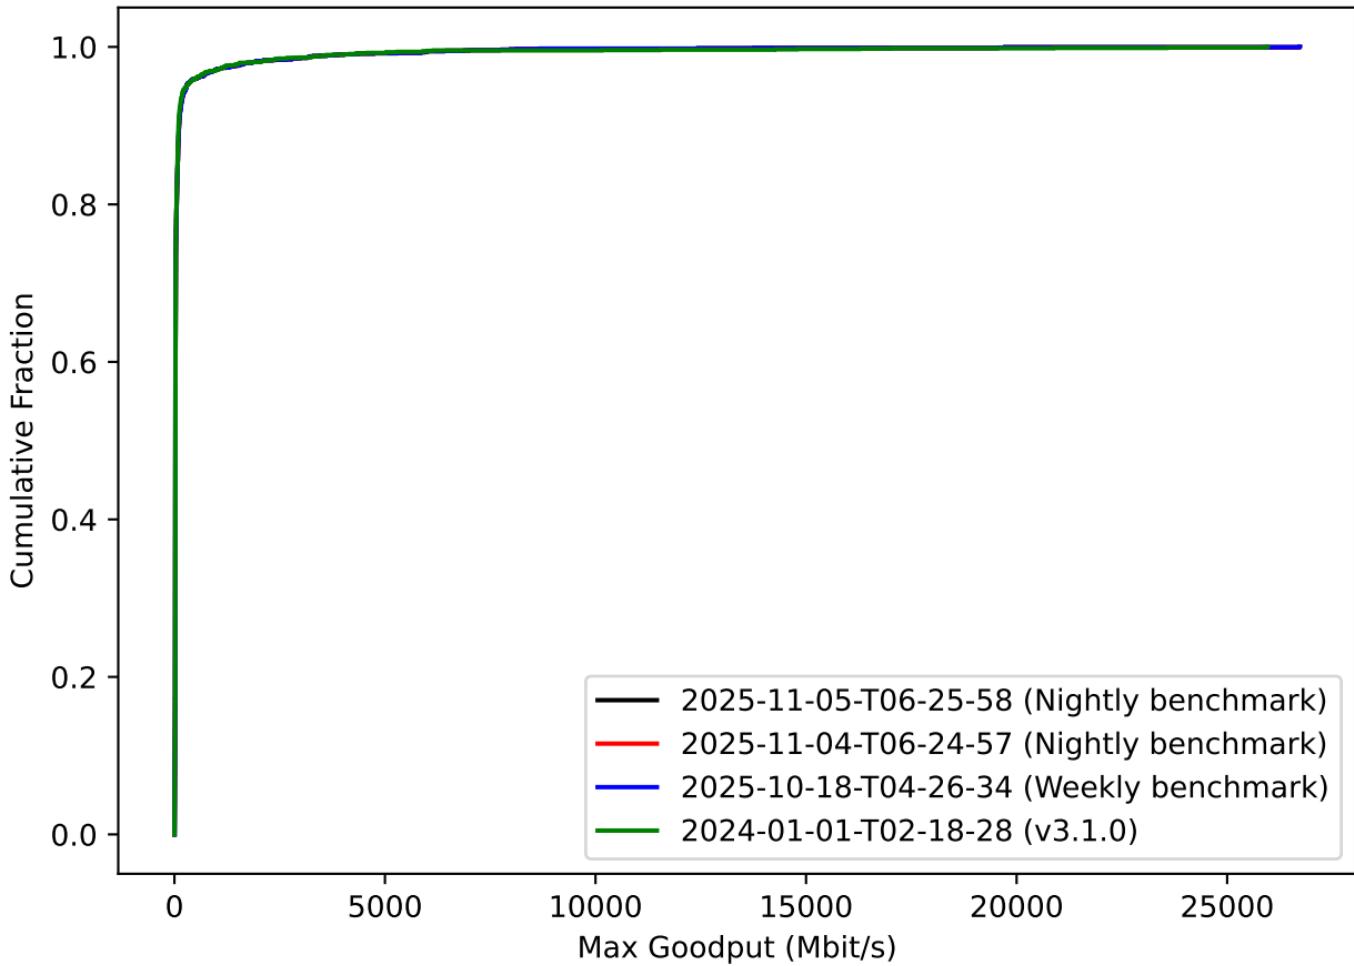

distribution of: median read goodput per second, across nodes

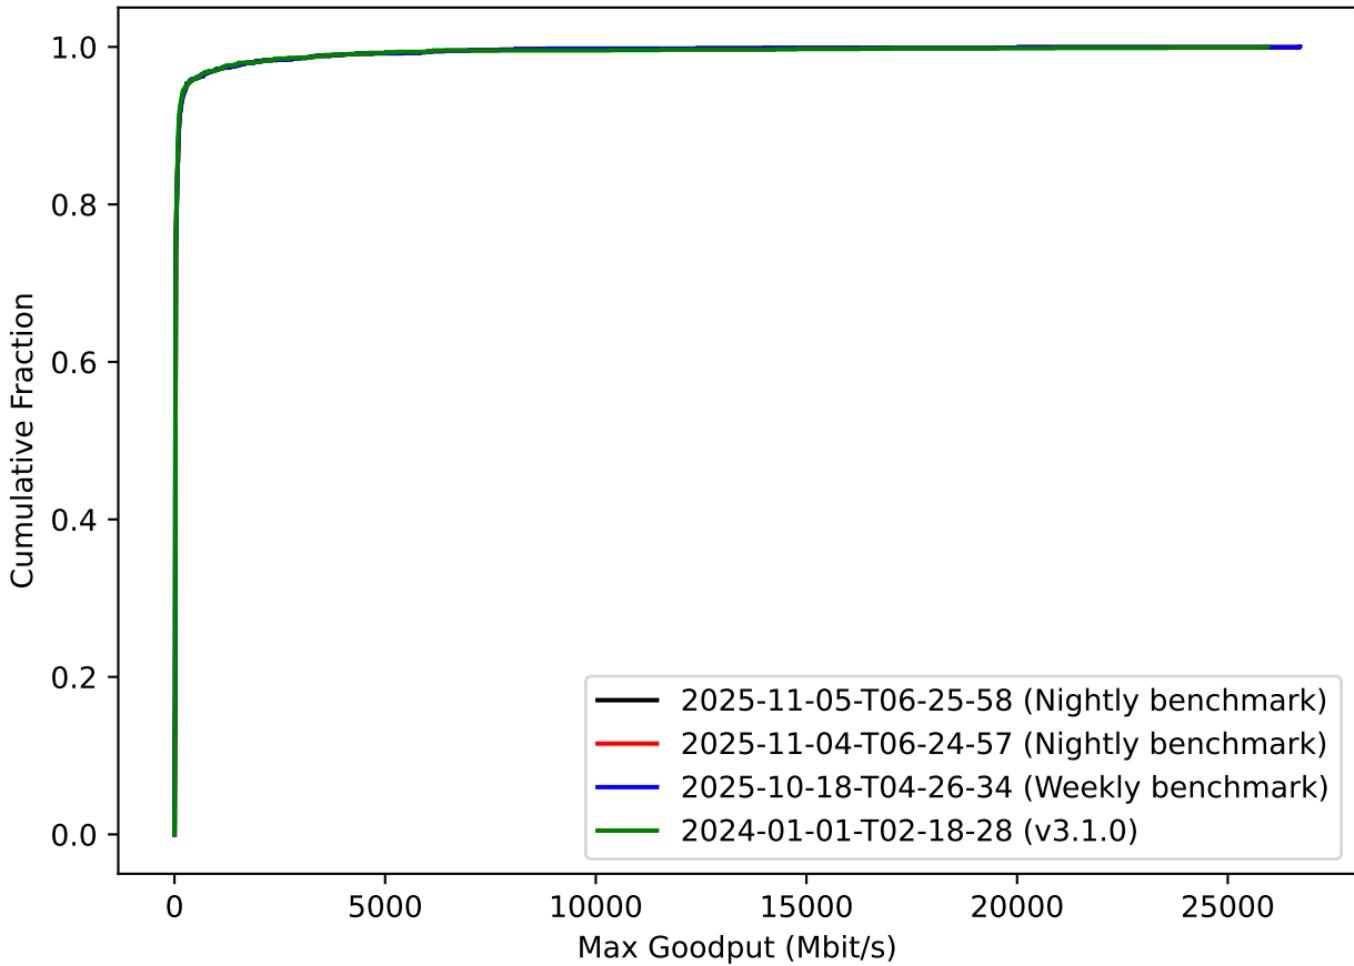

distribution of: median write goodput per second, across nodes

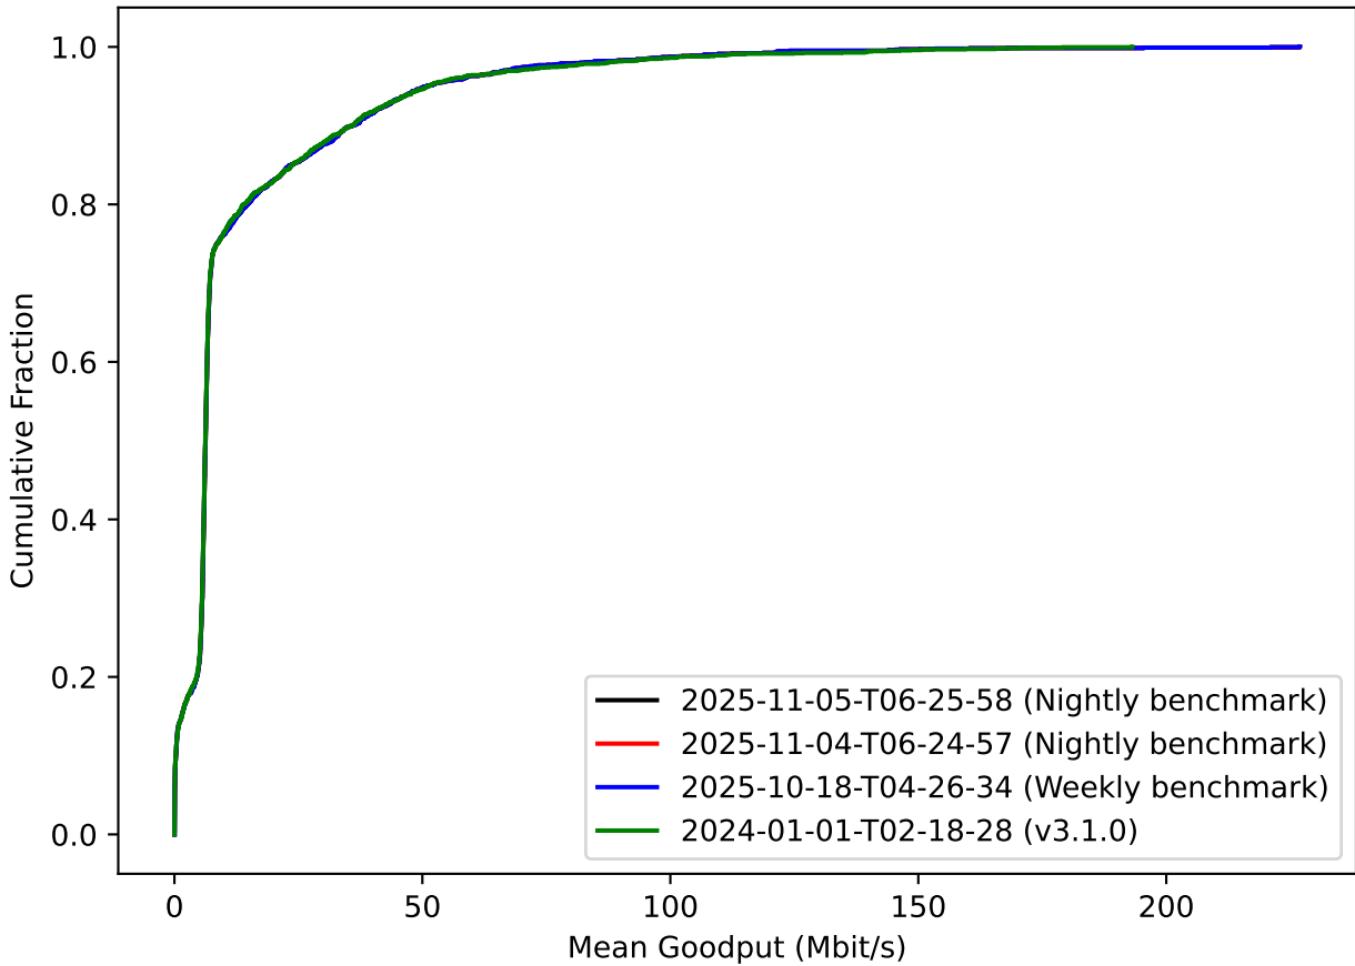

distribution of: max read goodput per second, across nodes

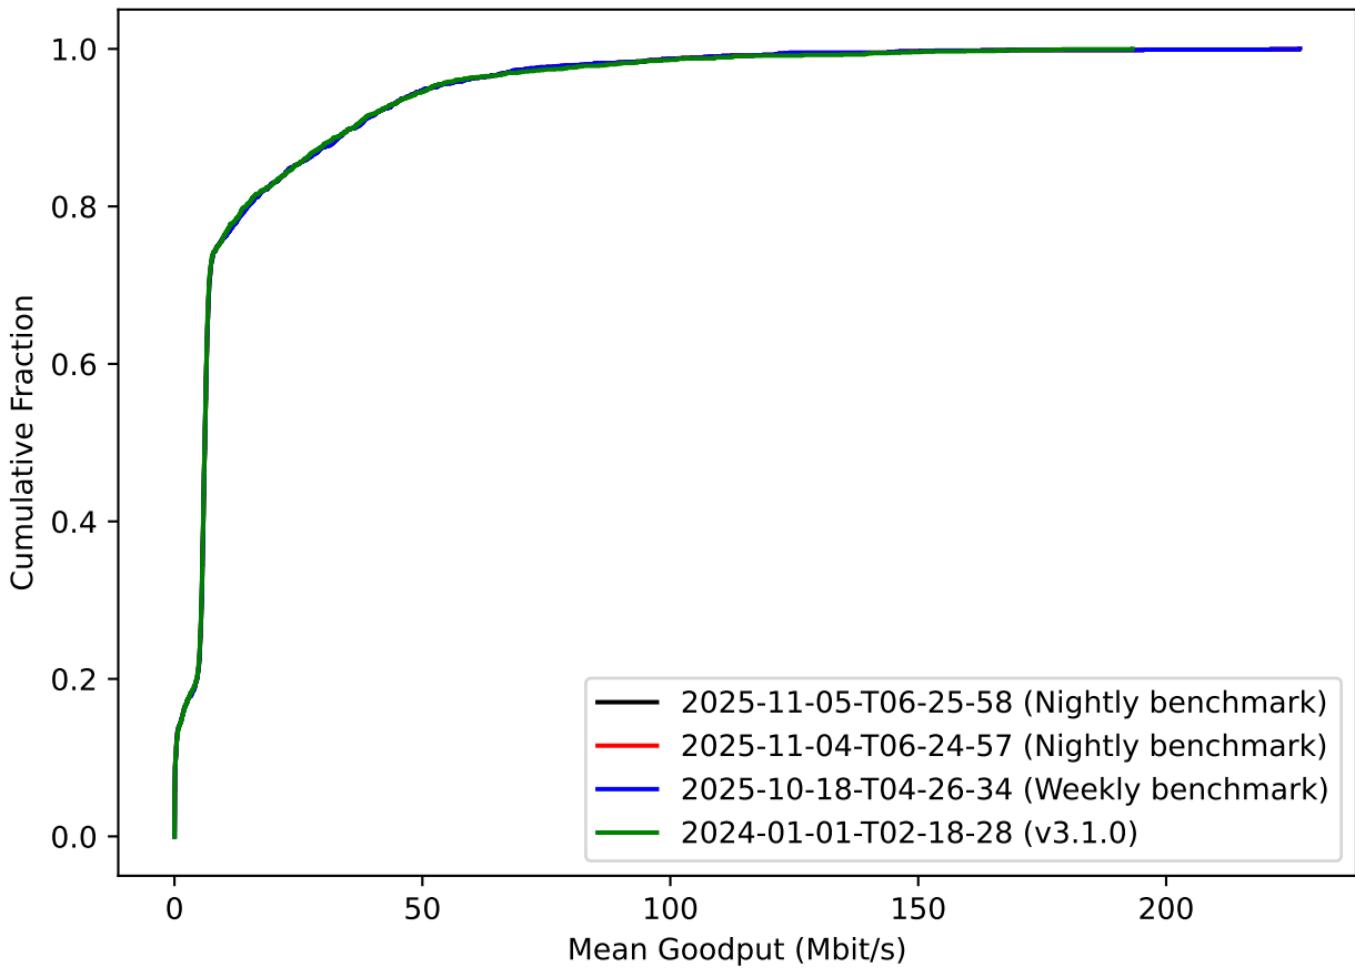

distribution of: max write goodput per second, across nodes

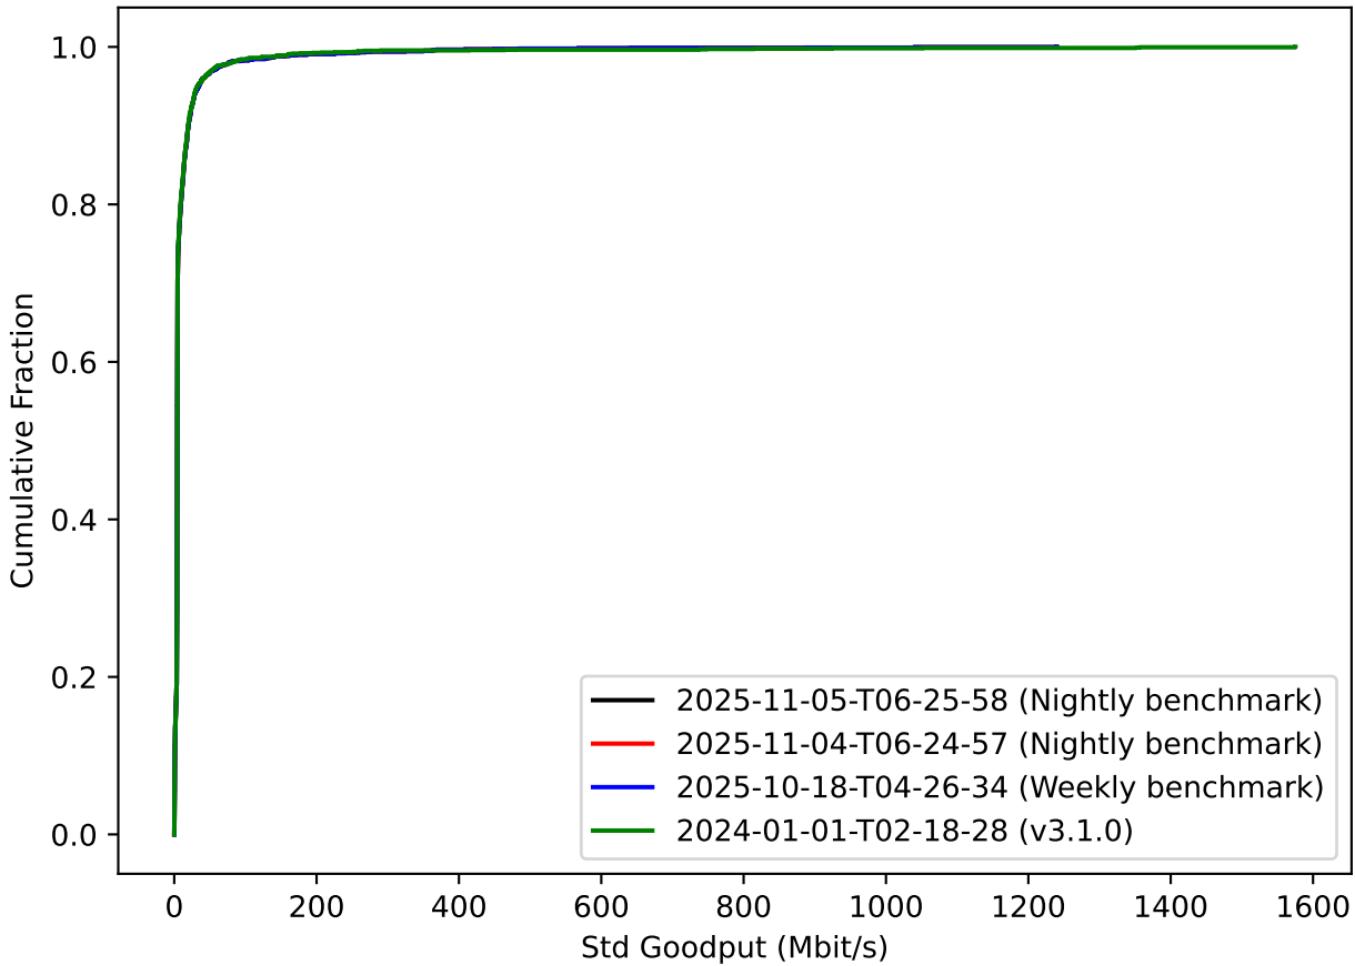

distribution of: mean read goodput per second, across nodes

distribution of: mean write goodput per second, across nodes

distribution of: std read goodput per second, across nodes

distribution of: std write goodput per second, across nodes
